
About the CD

How to Use the

Oracle Database 10g: The Complete Reference CD-ROM

The CD that accompanies this book contains a special electronic Adobe Acrobat pdf-format edition of [Oracle Database 10g: The Complete Reference](#). With this electronic version, you can easily transport all of the valuable information contained in the book to your PC while the printed version of the book remains in your office or home.

■ **NOTE:** To view the electronic edition of the book on this CD, you will need the Adobe Acrobat Reader program. If you do not already have it pre-installed on your system, you may locate and launch [rp505enu.exe](#) from your CD to install.

Viewing and Navigating the Book

You can easily view and navigate specific areas of interest within the book using the hyperlinked Table of Contents provided.

Viewing

1. Insert the CD-ROM into the CD drive of your computer (if you have not already done so).
2. Locate and launch the file [Book.pdf](#) from your CD drive. This displays the book's Table of Contents at left of screen and actual book pages at right.

Navigating

1. To view a chapter, click the plus sign to the left of the Part in which the chapter resides. This displays all chapters in the selected Part.
2. Click the name of the chapter you want to view (displays first page of chapter at right).
3. To view a section within a chapter, click the plus sign to the left of the chapter name (displays sections of chapter below chapter name), and click the name of the section you want to view.

Searching

1. Choose the [Search | Query](#) option from the Edit menu.
2. In the Adobe Acrobat Search dialog box, click Indexes.
3. In the Index Selection dialog box, make sure the box next to "Oracle Database 10g: The Complete Reference" is checked.
4. Click Add.
5. In the Add Index window, click "Index.pdx." Click Open.
6. In the Index Selection window, click OK.
7. In the Adobe Acrobat Search dialog box, type in the text for which you want to search.
8. Click Search (initiates the search).
9. In the Search Results dialog box, click the View button. This takes you to the first instance of found text matching the search criteria. Alternatively, you can double-click each occurrence of found text in the Results field to be taken to a specific match.

Using the Code

The tables used in this book are available for you to access and use without retyping! You can use these to easily work your way through the examples and experiment with the many techniques illustrated in this book. Simply locate and open [Tables.txt](#). You can freely select, copy, and paste the desired text from this file.

NO TECHNICAL SUPPORT IS PROVIDED WITH THIS CD-ROM.
